

World Delirium Awareness Day

Delirium and Related Distress: Prevention and Early Intervention

Wednesday, March 15, 2023

12 – 1 p.m.

Target Audience

Physicians, nurses, pharmacists, physical therapists, respiratory therapists, social workers, healthcare students and other licensed healthcare professionals.

Learning Objectives

- Review diagnostic criteria and current science for delirium, including its impact on patients, families, clinicians and healthcare systems.
- Identify independent risk factors for delirium, including modifiable precipitants.
- Discuss emerging strategies to help prevent delirium, provide early intervention and promote survivor and family well-being.
- Summarize how emerging strategies align with the Institute for Healthcare Improvement's Age-Friendly Health System recommendations.
