

Follow up on your referral for care

Be sure to see the specialist for the care you need.

Dear Valued Patient,

Have You Made Your Appointment?

It's risky to delay care for important screenings and health problems that can worsen with time. Please be sure to follow up on the referral I gave you for specialty care.

Sutter facilities are taking many extra precautions to help protect everyone who comes through their doors.

- Surfaces and equipment are sanitized frequently, and rooms are sanitized between patients.
- Staff, doctors and patients are screened for symptoms when they arrive.
- Virtually everyone wears a mask, and social distancing is practiced wherever possible.
- Patients with possible COVID-19 symptoms are treated separately from other patients.

See all the [steps Sutter Health is taking](#) to help keep you safer.

I look forward to checking in on you after your appointment.

Sincerely,

[name of referring doctor]
